

AIR GEAR

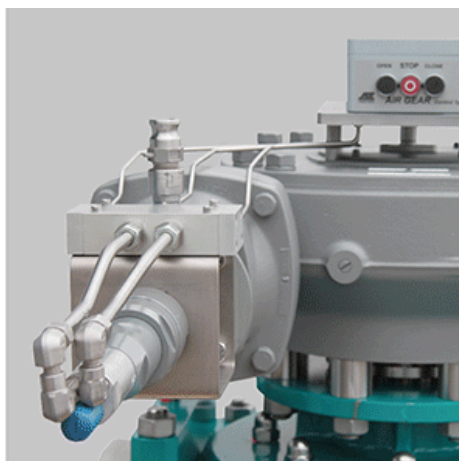

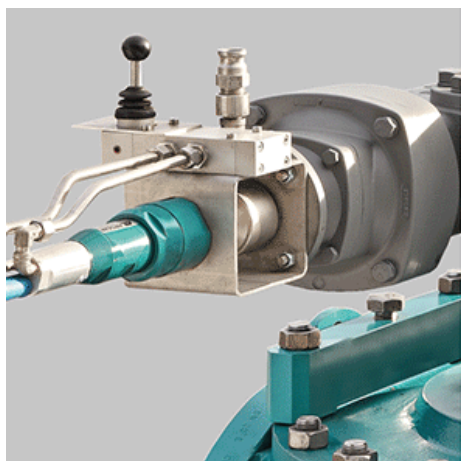

Alternative rotary actuator
90°/180°/270°/360°
for all valves with high torques

Design Features

Design Characteristics

- compact design
- $M_d = 100.000 \text{ Nm}$ possible emergency hand-operation
- double acting
- cost saving by using standard-components
- end position adjustable $0^\circ - 360^\circ$ (multiport automation)
- space and weight saving
- low air consumption
- retrofit
- pneumatic components for operation in Ex-protected area
- adjustable open / closing speed
