

MRV

Ball check valve

DIN-EN: DN 15 – 250 / PN 10 – 40

ASME: NPS 1" – 4" / class 150

Design Features

Design Characteristics

- temperature range up to 180°C
- metal design
- with heating jacket available
- with sightglass

Condition:

After the check valve in flow direction the pipe-DN must correspond to the check valve-DN. Recommendation for vertical type: DELTA.

When vertically installed ($=0^\circ$) resp. (up to 60° angle) ball check valves close automatically, because ball is guided in the centre of the bore. When horizontally installed ($=90^\circ$) resp. (up to 30°) the valves close automatically if the back flow related water is 1,5 – 2,5 m/sec.

Materials

Standard

- Carbon Steel 1.0619 / ASTM A216 WCB
- Stainless steel 1.4408 / ASTM A351 CF8M
- Stainless steel 1.4308 / ASTM A351 CF8M
- Unalloyed stainless steel casting (low Temp.) 1.1138 / LCC/LCB / A352

Special materials

- other materials on request

Sightglass

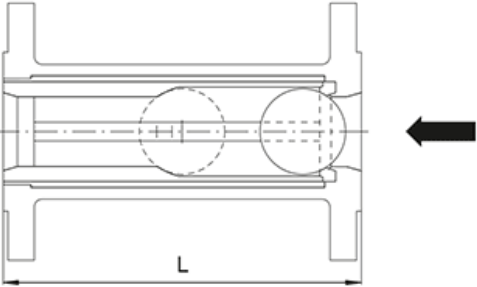

- Borosilikat

Ball

- PTFE
